RECYCLED PLASTIC SLATS  
(TABLE TOP AND SEATS)

Recycled plastic offers a range of benefits in site furnishings. Beyond its modern look, it helps to reduce the amount of plastic waste in landfills and oceans, contributing to a cleaner environment. Additionally, recycled plastic is durable, weather-resistant, and low maintenance, making it ideal for outdoor use. Using recycled plastic in site furnishings helps to conserve natural resources and reduce the carbon footprint associated with producing new plastic materials.

## RECYCLED ALUMINUM FRAME

Recycled aluminum helps reduce the demand for new aluminum production, which requires significant energy consumption. Using recycled aluminum also helps divert waste from landfills, contributing to a more circular economy. Additionally, recycled aluminum is durable, corrosion-resistant, and requires minimal maintenance, making it ideal for outdoor use. Its lightweight nature makes it easy to transport and install, while its malleability allows for intricate and versatile designs.
